Give three observation / suggestions to improve the overall teaching – learning experience

in your institution.

157 responses

.

No

Everything is good

Good

No suggestion

No suggestions

Nice

tecaching good

Improve way of communicating with students.

A

No suggestions the teachers are good.

Suggestion:
1.Institute should try to support students in assignment submission timings(specially students who are working or opting professional course)
2.Should try to minimize partiality of internal marks between regular and non-regular students.
Observation:
1.Institute encourages student for extra curricular activities 💯
2.Institute also tries to give internship placements to students 👍

They should use various learning techniques such as powerpoint presentation, surveys etc

1. Train the subjects teachers to approach students in a correct manner, a more polite approach would be appreciated. 2. Explain their concepts in a manner all students get a good understanding of the learnings and practical use of the concept. 3. The institute should arrange more student friendly competitions to encourage the participation and growth by learning from such competitions.

: 1) Use better graphics and visual media to engage students well. ... 2) Try to reach every

student and ask for their doubts. ... 3) Make teaching a two way interaction.

•Some Teachers are focused on other activities rather than study's
•Some teachers teach well but they teach very slowly.
•Some Teachers teach well but the they teach fast.

Real life example, collaborative learning , special courses

Teacher should use presention in every lecture

Excellent professors with immense knowledge

Flexible learning environments,Using better graphics and visual media to engage students , encounter students to work in team

The behavior of the teachers is very good.
Teachers should increase communication with students.

Great teaching way
Encouraging
Always helpful

Is good

No comments

I have learn that we are to learn their experience

No it's perfect

Increase break time

Teaching should be done in English only as it will improve Communication. Also, PPT's should be used while teaching to make it visually interesting and also easily understandable.
Otherwise Teaching is really good and also the Teachers solve doubts really well.

Improve the communicate every student

Best Learning Experience

Improving the weak students

Inform students about assignment in WhatsApp groups please

Teacher are very good in teaching

1-Give practical examples
2- use of projector /ppts

3- should be humble while teaching

Should communicate with poor in study student without any fear

More communication

Motivational speech required

All is good here

Should teach only relevant topics.

Use of ICT tools while teaching and teacher should give good examples while teaching

1) Form strict rules towards attendance
2) monthly physical activity should be
taken
3) strict action towards irregular activities.
caught

Incorporate movement and break
Consider mindfulness activities
Teach lessons in different format

Good experience of learning

Best teaching techniques
Best faculty in our college

Extra curriculars activity can be promoted,time to time updates

Can take us to companies or field trips for us to understand the process exactly

Good 👍

Good and experienced staff

It's all good teaching
Nothing is there improve old teachers but
Only New teacher are have to improve there teaching activities

GOOD

Rekha Chetwani Worst teacher she only shows attitude and talks wrong for students she says khudka muh dekho pahele aaye ho ca karne she talks very wrong she talks in very rough way

More use of technology should be done

Not good

Perfect teaching technique

Very helpful

Mandatory attendance for students

Teacher should focused on modern teaching method

They should provide online notes.

Well all process and teachers are good and qualified

1. Projector learning

..

By using more examples

Using better graphics and visual media to engage students .

Its good already

Increase breaktime.

Nothing to improve all is ok

1. They should show more and more ppts
2. They can conduct group discussions
3. The teachers are very polite with the students

Sessions can be more interactive and two way rather than only faculty speaking.
More class activities such as ppt presentations and peer teaching should be encouraged.

More understanding should be done

1) Insure that every student will get pass by telling them the important question... As there time will not waste ...
2) ask everyone about there intrest then give them detailed journal of it.
3) now everyone will be free from exam pressure and can focus on there abilities and perform that which is necessary for there career.
For example:- i want to crack CAT entrance .
Teachers should give all important question of the specific year to let me clear bcom in easy way and give my best to prepare for CAT.
4) other than syllabus learning such as confidence, soft skills, corporate experience, commerce field and the benefits and stock market info should be given to students

I think I have a lot of observation and suggestions yet....
Thank you for the opportunity...

Good
excellent
Very good much

1.More communicate with students.

1. It would be better if the some of the teachers were more empathetic and compassionate towards students, many a times rude or insensitive comments are thrown towards students, and with no room to rebut it brings down students morale , can also be interpreted as form of micro aggression towards students.
2. It is often observed that teachers aren't up to date with the latest career and paths to take, making it useless to look up to them for any credible advice regarding our future .
3. Teachers can prep better for classes as many of times their teaching seems so repetitive and text book oriented, it seems they don't even have their own opinion, same examples are used over and over again, with no discussion of new ideas.
Few of the teachers are really great, sadly can't say that for every teacher.

Good
Excellent
Very much good

Nothing

1) overall teachers are best but teachers should understand students problem fir late submission sometimes. 2) communicate with students about studies and doubts. 3) should provide important topics before exams. Thank you

Understanding

1) Use better graphics and visual media to engage students well.
2) Try to reach every student and ask for their doubts.
3) Make teaching a two way interaction .

Not that good.

To imrove in understand students

If we don't understand what was taught they explain it again

It's already very well

1. Teachers attention towards student
2. Making studies interesting rather than making it boring.
3. Talking with students to connect with them

Excellent

Interactive sessions with each student.
Approve the suggestion given by student.
Active Participation of student and teacher while sessions.

explanning concept through examples.
use of ICT tools
Practical learning

More extra curriculum activities should be taken.
Should take students to field visit.

1. Use Technology: Add smart tools like projectors and apps to make learning fun and interactive.

2. Engage Students: Include group activities, discussions, and hands-on projects to make classes more interesting.

3. Train Teachers: Provide regular training to help teachers learn new methods and improve their teaching skills.

Every thing is great

Kindly give more project and real time problem to solve.
Courses can be more research oriented.
New technology monthly updates can be given.

Clear questions
Attentive
Delebrate communication

The teachers should emphasise more on practical knowledge
Some more guidance should be provided before exams
Otherwise its all fine

-

All are very good

Few teachers gave their satisfactory services, while few where just in a sense of completing the syllabus ,which failed in giving a quality service.
However, it went good with self - study.

Should promote more visits to programs/organisations

No need of suggestions as teachers are already very cooperative with students.

Use software skill for learning.

1.Should complete the syllabus earlier.
2 Always give positive attitudes towards the students.
3. Use of technology such as LCD projectors must be their for well understanding.

Take practice of students and revisions of topic taken
Tests on regular basis
Interact with students and solve their doubts
